### Investment Objective

---

- The Accounts offered by Platinum Hedge Holdings Pty Ltd provide a dividend contribution payment to each investment unit at a rate of 22 % per annum.
- Offer units that are fully 100% protected by actual commodities, real estate, listed shares or currency.
- To Preserve (Protected Investment) and generate capital growth over this period.
- Maintain returns of 46% since inception
- Select your own term of 1 month – 12 months
- A positive percentage movement in the selected unit/s will be provided as a percentage rate of return that is equal to/or the same as that percentage increase.
- The units may be listed on the Australian Stock Exchange in the 12 month period, thereby creating an additional source of revenue and liquidity from the initial contribution. The basis is one ASX fully paid ordinary share or Exchange Traded Unit for each corresponding unit/s that represent the same value.
- The Portfolio can use currency-hedging contracts to mitigate the risks of fluctuations in foreign currency movements with respect to investments domiciled in foreign countries.
