

Luminary Minerals is a corporation that unites a set of emerging companies in mining, hardware, and technology

## WELCOME TO LUMINARY MINERALS

**Luminary Minerals** Ltd. is a growing provider of proven solutions for the mining and security sectors worldwide. Luminary Minerals operates four subsidiaries within thriving market segments, generating revenue serving a diverse customer base with a wide range of product offerings.

**Luminary Minerals'** wholly owned subsidiary Pacific Access Control has been providing card reader and access control system design, installation and consulting since 1997. Singertech Tools, a pioneering tools and machining company in business since 1988, is the creator of the original Lever Neutralizer, a proprietary lock cutting device that enables customers including law enforcement and locksmiths to disassemble grade 1 and 2 locks rapidly without damage. Luminary Minerals Mining, another growing subsidiary, is an established diamond producer operating in Brazil and pursuing mineral rights throughout South America and the United States. Luminary Minerals subsidiary Extraction Tech is a quality-driven surface mining equipment company.

By bringing this independent but complementary group of business interests into unison, Luminary Minerals is working to expand market share and spearhead new explorations with cutting edge tools and industry leading support systems.
